

## **Minor Research Project – Dr. R. P. Ingole**

**Subject : “Analytical Study of Working & Financial Condition of Chandrapur District Government Milk Scheme (2010-2014)”.**

### **SUMMARY**

#### **Introduction :**

Milk is an essential thing in human life. All the people of the world, by and large, have it drinking milk directly or in the form of other products of Milk on every stage of life, milk or milk products are to human kind. It is well known fact that human beings right from their birth drinks mother milk and thereafter we intake cow & buffalo milk. Milk is a complete food in itself. One can lead the life by drinking it only.

Milk contains all the nutritional properties which are required for good health of human being. It contains proteins, carbohydrates, vitamins, minerals etc. It also contain vitamin like A, B, B2, B5, Rinoctomin in a large quantity.

AS the milk is a complete food in itself. It is also essential for the business purpose. The economic development of our country is depend on farming, hence cattle conservation becomes essential as complementary business. Dairy is a occupation which can make strong to the economic condition of the farmers.

Now a days, most of the farmers look at the dairy as a complementary business to the farming. Hence they turn for the business of dairy. But the problem is that farmers do not get proper customers in their area. And also they do not have proper facilities of transportation to reach upto the customers. Hence farmers have to face some problems regarding.

To overcome from this situation the government of Maharashtra has opened a Government milk scheme is every district of the state. But this scheme whether functioning properly or not? Is if fruity food to the farmers? Is it helpful to increase the economic conditions of the farmers? Is this scheme is helpful to supply milk at right time at the right place. Is this scheme help to

maintain quality of the milk? These are the question and to find out the answers to this questions, this research is undertaken.

**Objectives:**

- 1) To know the position of Dairy farm in Government Sector.
- 2) To know the position of Demand &Supply in Chandrapur District Government milk Scheme.
- 3) To find how to balance of Demand and supply through Government scheme.
- 4) To know the expenditure of Project establishment and operational on Government milk scheme.
- 5) To know sources of capital Supply in Government Milk Scheme.
- 6) To know the position of collection & system of Transportation of Milk.
- 7) To know the process of milk and storage capacity.
- 8) To know the methods of milk distribution system.
- 9) To know about the Recruitment, Salary Promotions, Facilities & Motivational Factors, of official & Technical Employees.
- 10) To know the methods of quality control in Government milk scheme.
- 11) To study about cash flow analysis.
- 12) To know about purchase & sell in Government milk scheme.
- 13) To Study the comparative position of profit & loss.
- 14) To know total cost of Government milk scheme.
- 15) To find out the reasons of continuous loss in Government milk scheme.

**Methodology:**

The Government of India has established a government milk scheme by taking into consideration the importance of milk in human life. Thus economic development of farmers from Dairy Business and complementary business to the farming in the modern world.

The functions of government milk scheme is not satisfactory. So there is a ample of scope in bringing out some reforms in govt. milk scheme.

**Data Collections Through Observation**

The researcher has visited the place of Government milk scheme centre in Chandrapur District and himself observed the functioning of Government Milk scheme.

**Data Collections Through Interview**

The researcher has visited the place of Government milk centre and personally meet the people involved in the scheme such as manager, chemical

Engineer, Collection officer, Distributor, Account Officer & other staff and interviewed them and collected the information regarding the same.

### **Data Collections Through Literature**

The researcher collected the information available in the form of Books magazines and articles and also collected the record concerning Govt. Milk Scheme.

### **Data Collections Through the Stud of Various Accounts Books**

To Study the economic factors in Govt. Milk Scheme the research had studied the various accounts books & collected analyze the data.

### **Main findings:**

- 1) In rural area, milk dairy business is supplementary business of farmers for this development milk scheme is established in Chandrapur District to achieve the goal of 'Bahujan Hitay, Bahujan Sukhay'.
- 2) Chandrapur Government milk scheme collect milk through songh center, Government center and colling center sometimes milk collections is more or less. Milk dairy plan limitation is 50,000 liters but collection of milk is very little and expenses on it is much more. So collection officer do not give attention to it. so it clears poem research that collection work is not properly occurd.
- 3) Milk dairy plans use the modern technology for extracting milk, The technology use for without waste of milk and maintain the level of qualities.
- 4) The lack of milk distribution channel milk is not proper available hence local people have facing more problems. So milk is procided by other plans also and expense on it is much more. Because of the lack of modern technology. We can not use remaining milk to create milk products, so milk waste
- 5) Capital expenditure is much more that profit margin . It clears from the research that much more loss will be bear.

### **Suggestions for teachers :**

In this researcher, the researcher has studied about various aspects related to the Govt. Milk scheme, like collection process, distribution process, quality control, purifying process and economical aspect of dairy and social impact. So this study is valuable to the teacher for their teaching purposes and also helpful for the further prospect researcher.

Researcher suggested the teacher to use this information for the self improvement and self development and also for the betterment of the society overall.

**10. Title of the project:** Analytical Study of Working & Financial Condition of Chandrapur District Government Milk Scheme (2010-2014)’.

**11. Objectives of the project:** To know the position of Dairy farm in Government Sector.

- 1) To know the position of Demand & Supply in Chandrapur District Government milk Scheme.
- 2) To find how to balance of Demand and supply through Government scheme.
- 3) To know the expenditure of Project establishment and operational on Government milk scheme.
- 4) To know sources of capital Supply in Government Milk Scheme.
- 5) To know the position of collection & system of Transportation of Milk.
- 6) To know the process of milk and storage capacity.
- 7) To know the methods of milk distribution system.
- 8) To know about the Recruitment, Salary Promotions, Facilities & Motivational Factors, of official & Technical Employees.
- 9) To know the methods of quality control in Government milk scheme.
- 10) To study about cash flow analysis.
- 11) To know about purchase & sell in Government milk scheme.
- 12) To Study the comparative position of profit & loss.
- 13) To know total cost of Government milk scheme.
- 14) To find out the reasons of continuous loss in Government milk scheme.

**12. Whether objectives were achieved:** Yes

**13. Achievement from the project:** .

Some important things are presented with the help of this project. The brief information of this is given below.

- 1) Objects behind the establishment of Government dairy plan.
- 2) Collection method of government milk dairy is known and it is helpful to find out the faults.
- 3) It is helpful to find out reasons behind excessive cost of government milk dairy plan.
- 4) From this research we find that control methods and collection capacity of milk is more but milk is not collected in that proportion.
- 5) We gain the information of employees in government milk dairy plan. their excessive work and their difficulties. We find loss in milk scheme even after continuous productions. No one employee to first category (Class-I) so other employee can not take individual decision. All this information is easily available from this research.

**14. Summary of the findings:**

Some important conclusions are given below :

- 6) In rural area, milk dairy business is supplementary business of farmers for this development milk scheme is established in Chandrapur district to achieve the goal of ‘Bahujan Hitay, Bahujan Sukhay’.

- 7) Chandrapur Government milk scheme collect milk through songh center, Government center and colling center sometimes milk collections is more or less. Milk dairy plan limitation is 50,000 liters but collection of milk is very little and expenses on it is much more. So collection officer do not give attention to it. so it clears poem research that collection work is not properly occurred.
- 8) Milk dairy plans use the modern technology for extracting milk, The technology use for without waste of milk and maintain the level of qualities.
- 9) The lack of milk distribution channel milk is not proper available hence local people have facing more problems. So milk is procided by other plans also and expense on it is much more. Because of the lack of modern technology. We can not use remaining milk to create milk products, so milk waste
- 10) Capital expenditure is much more that profit margin . It clears from the research that much more loss will be bear.

**15. Contribution to the society:**

Various information search through this project study on the basis of this information we can solve various difficulties. The contribution of this project study in development of farmers and society is as follows.

- 1) Dairy business is available to farmers as supplementary business. The information of various plans, various methods we in that place is easily available.
- 2) From this research it clears that collection methods and controlling methods are excellent. It is helpful to clear the doubts of quality of provided milk to society.
